ANY MEDICAL PROBLEMS \_\_\_\_\_

SUBJECTIVE SYMPTOMS: \_\_\_\_\_

Root canal treatment is an attempt to retain a tooth that may otherwise require extraction.

Although root canal therapy has a high degree of success, it cannot be guaranteed.

Occasionally a tooth that has had root canal therapy may require retreatment, surgery, or even extraction.

I also understand that the root canal filling restores only the root portion of the tooth. The crown portion must be restored by an additional procedure, for an additional expense.
